

# Before Long

## Steve Anderson

I've never been here  
I know you can see me  
Your face isn't clear  
I sense you nearly  
So now is the time  
have to stay ahead  
The moment is mine  
when you came and said

The place around me now  
is where you stuck that day  
And the changes I found  
watched them fall away  
So now is the time  
or will you disappear  
The moment is mine  
could it ever be here?

So now is the time  
have to stay ahead  
The moment is mine  
when you came and said  
So now is the time  
or will you disappear  
the moment is mine  
could it ever be here?

So now is the time  
or will you disappear  
The moment is mine  
could it ever be here?

The place around me now  
is where you stuck that day  
And the changes I found  
watched them fall away  
So now is the time  
or will you disappear  
The moment is mine  
could it ever be here?
