

# Great Work of Ages

## Mayhem

Arrival of an achromatic mechanism  
Hidden agenda, pious fraud of ages  
Control, alteration, manipulation, antagonism Human abilities perish in the acid of sorcery  
Their senses turn into rusty strings  
Victimized, possessed, superhuman undead Shattered be the crystal of a lost civilization  
Consumed be the human brain And like hot sands slashing  
Across the deserts face  
The lies whirl about the earth
