Everything I

Lollipop Lust Kill

It seems I like it when you cry
My co-dependant lullaby
I'll only play when I make the rules
Your mental weakness is my obvious tool
It seems I like it when you cry
So let me inside
I'm alone with you and you're afraid of me
Tightly close your eyes and pray you just can't see
Everything I, everything I
Everything I, everything I
[Incomprehensible]Blow out the candle, save the light
One last dead breath it ends your night
Hold out your hands and pray not to die
Grow your little white wings and let your angel fly
Blow out the candle save the light
And let me inside
I'm alone with you and you're afraid of me
Tightly close your eyes and pray you just can't see
Everything I, everything I
Everything I, everything I
Well, everything I took from you
All the lies that you believed

Well, everything I misconstrue
Is everything you can't conceive, yeah
Can you see me here alive with your own two eyes?
Can you see me here alive with your own two eyes?
Can you see me here alive?
Please won't you tell me why you died
And within the deadness was their light?
Where are you now and how does it feel?
Is there a soul or is our mind the real?
Please won't you tell me why you died
And let me inside?
I'm alone with you and you're afraid of me
Tightly close your eyes and pray you just can't see
Everything I, everything I
Everything I, everything I
Well, everything I, everything I

Want
Everything I, everything I
Need
Well, everything I want you to see
Well, everything I want you to be
