Needing Someone

Gene Clark

You say that you need
Someone you can depend on
I say that I need somebody too
So put your mind at easeYou know that you can count on me
For anything you want me to do
I should have told you before
But this time you got through to me
So much more, so much moreYou say that you need
A way to make your mind up
I need to find out which way to go
If you think you see me
Then maybe we will wind up
Bringing back the time that I miss soYou know that there's so much we can do
We could have everything we need
Before we're through
And more before we're through
Ah, la la la la, la la la, ah
