

Feel What I Feel

Kat DeLuna

Why can't you smile, shake a hand
Joke around when you're under?
Doesn't take that much to do it
Sing a song when you're down
Cause I know that you wonder
What is coming over me Don't you keep it in, gotta let it out
Swing your head around
Tell em what you're all about
Just believe it and get with it
And when you hear the sound Don't you know that I was made for this music?
When I hear it, take a ride and I lose it
All my worries step aside
When I hear a simple melody Let me in like the wind, let me take it higher
Make you feel what I feel
I'll be that song that you play over and over
Make you feel what I feel Can you feel me?
Can you feel me?
Can you feel me? See I don't mind, I don't hide
Because, cause I'm open
What I gotta do to prove it?
Walk a mile in my shoes
Will you dare take a journey?
With me is where you wanna be Don't you keep it in, gotta let it out
Swing your head around
Tell em what you're all about
Just believe it and get with it
And when you hear the sound Don't you know that I was made for this music?
When I hear it, take a ride and I lose it
All my worries step aside
When I hear a simple melody Let me in like the wind, let me take it higher
Make you feel what I feel
I'll be that song that you play over and over
Make you feel what I feel Can you feel me?
Can you feel me?
Can you feel me? Don't you know that I was made for this music?
When I hear it, take a ride and I lose it
All my worries step aside
When I hear a simple melody Let me in like the wind, let me take it higher
Make you feel what I feel

I'll be that song that you play over and over
Make you feel what I feel Don't you know that I was made for this music?
When I hear it, take a ride and I lose it
All my worries step aside
When I hear a simple melody Let me in like the wind, let me take it higher
Make you feel what I feel
I'll be that song that you play over and over
Make you feel what I feel Can you feel me?
Can you feel me?
Can you feel me? Can you feel me?
Can you feel me?
Can you feel me? Can you feel me?
Can you feel me?
Can you feel me?
