Sun In The Night

Lighthouse Family

How many times in your life have you ever had the feeling
That the way you live is crazy and there must be something else
When you look at the sky does it ever cross your mind
There could be something you've forgotten that won't ever go awayLike the sun in the night
Like the sun in the night
You'll always be with me baby, be in my soul
You'll always be with me, wherever I goGets too much after a while trying to always hide your feelings
When the world is going crazy and you keep it to yourself
How much it hurts, though you try, try to get on with your life
And tell yourself that worse things happen and just hope it goes awayLike the sun in the night
Like the sun in the night
You'll always be with me baby, be in my soul
You'll always be with me, wherever I goLike the sun in the night
Like the sun in the night
You'll always be with me baby, be in my soul
You'll always be with me, wherever I go
You'll always be with me baby, be in my soul
You'll always be with me, wherever I go
