Aftermath

Hurt

Somebody take me away from this darkness
Somebody take this from me
If anyone's out there
If anyone hears me
Somebody take this from me
I was beginning to think i'd lost my mind
Fell upon it hard and fell upon my hardest times
But the way she lit the room at night
Cast the shadows to their gloom and i
Still dream of your perfume
I would do anything to be with you

Edelweiss... angel why... comfort me
From so far away
Angel white... dream of mine... come for me
From so far away
Angel eyes... sweet love of mine... come back to me
Though so far away
Please don't cry
There's still time
I won't change
So far away
Please don't cry
I won't...
