

# If Only We Could

Shannon Wright

Though it may seem  
You never denied me of anything  
You said in your worthless lie

Better stay with your own and I'll stay with mineBut if only we could just leave from this place  
And step away from your black "frivoled" sky

If only we could just leave from this place  
And step away from your black "frivoled" skyBetter watch what you say  
You might just find out your words have no worth  
You said in your miserable lie

Better stay with yours and I'll stay with mineBut if only we could just leave from this place  
And step away from your black "frivoled" sky  
If only we could just leave from this place  
And step away from your black "frivoled" skySuch a mistake  
Such a mistake to spend time on you  
Such a mistake

Such a mistake to spend time on youBut if only we could just leave from this place  
And step away from your black "frivoled" sky  
If only we could just leave from this place  
And step away from your black "frivoled" sky
