

Fragile Bird

City and Colour

When she sleeps
There is a fever dream, yeah
It brings a night terror
To haunt this fragile bird She speaks in tongues
Her words they come undone, yeah
And with the wayward mind
She struggles through the night All that I can do
Is hope she makes it through, through the night, through the night These cold nightmares
They make her worse for ware
Lost in the dark
She's got a heavy heart And when she wakes
In her fragile state
When she calls my name
Hopin that I keep her safe All that I can do
Is hope she makes it through
All that I can do
Is hope she makes it through Through the night (x4) All that I can do
Is hope she makes it through
All that I can do
Is hope she makes it through
Through the night
