

Stomach Song

Broken Social Scene

Some boys I know
They speak with broken mouths
I have to sit inside their stomachs
To find out what they're really about But not like the days
When the sky is blue
And all that I heard
Was a little of me in a little of you Some girls I know
They speak with broken mouths
I have to sit within their stomachs
To find out what they're all about 'Cause nowadays all people want are pills
To help them not to talk, to help them not to feel
And they can't believe their eyes, several times I've seen them try
No, they can't be their lives Some boys I know
They speak with broken mouths
I have to sit inside their stomachs
To find out what they're really about I have to sit inside their stomachs
