

# Come Close

## Medic

Come close to me  
Let everything fall away  
Take me now to secret places deep inside my heart  
Come close to me  
Come and calm these raging seas  
I'm feeling dry and weary but you said you're all i need  
Love, do you believe in me?  
I find it so hard to see you here  
I find it so hard to see  
You know, you know, you know  
I've been circling round these creeping doubts  
But i know that you can save me now  
I know that you can save me  
Time has got ahold of me  
These bones are breaking but this heart will be  
Hearing every promise made to me of what is yet to come  
I'll break these ties belief is everything i recognize  
To light the fire caught inside our eyes  
We'll be the ones in time  
Come close to me
