

Retrograde (feat. Spencer Sotelo of Periphery)

Jason Richardson

Can we resist collapse of our potential
Enter into the grey
every step into the duality
We're holographic in a multidimension
collecting our insanity Behold the decay
In all that we say
Belittling a light within its day We're holographic in a multidimension
(Whoah) Silence of the death within your soul
Let it flow
Scream out a message to the world
Just let it go
Fly in the moonlight
From death we run
Scream out a message to the world
Just let it go (K-kah)
(The cool rays tearing down the skyline
Watch the worlds collide)
Silver war
From death we run
Your blood is like the morning sun
Morning sun
Silence, I doubt that liquor's in your soul
Taking full control thrust into your mouth
Yeah In retrograde Can we resist collapse of our potential
Enter into the grey
every step into the duality
We're holographic in a multidimension
collecting our insanity Behold the decay
In all that we say
Belittling a light within its day We're holographic in a multidimension
(Whoah) Silver war
From death we run
Your blood is like the morning sun
Morning sun We're holographic in a multidimension
(Whoah)
(Retrograde) Silver war
From death we run
Your blood is like the morning sun
Morning sun

Silence, I doubt that liquor's in your soul
Taking full control
In retrograde Silence, I doubt that liquor's in your soul
Taking full control down to your boots
