

# Save Me

Muse

Save me from my superstitions  
Now I'm free from this old condition

Wait just a while

And I'll greet you with a smile

Hold me cos I'm sure I hated

Promises they are overrated

Wait just a while

While I'm drowning in denial

Turn me into someone like you

Find a place that we can go to

Run away and take me with you

Don't let go I need your rescue

Watch me cos I'm on a mission

Hold me back so I'm forced to listen

Don't let me go

Cos I'm nothing without you

Turn me into someone like you

Find a place that we can go to

Run away and take me with you

Don't let go I need your rescue
