We're So Far Away

MAE

Remembering everything
About my world and when you came.
Wondering if the change you'd bring
Means nothing else would be the same.Did you know what you were doing?
Did you know?
Did you know how you would move me?
Well, i don't really think so.But the night came down and swept us away
And the stars they seemed to paint
The most elaborate scene to date.How could we know?
That song, this show.
We'd learn so much about ourselves
From Toledo to Tokyo.
The words were scribed on every page
And now there's books up on our shelves.Did you know how you would move us?
Did you know?When the light first came upon us
And we saw the ever glow
And the moment's magic swept us away
And a young man's dream was almost seen so plain.When was the night that showed us the sign?
Revealed in the sky to leave all behind.
But where to begin?
Throwing caution to the wind,
We reached for the stars.
Everything was now ours.Did you know how you would move me?
Did you know?
Did you know how you would move me?
Well, i don't even think so.But the moment's magic swept us away.
And it's so close but we're so far away.
It's so close but we're so far away.
