

Storm

Heather Nova

Storms out on the water
I watch you getting closer
Are you comin' home?
All these years we've wondered
Tryin' to break the cycle
All these years of hope And my heart feels the strange
But it makes me feel like I'm alive again
Well sometimes in our lives, we need the pain So I find some candles
Put out all the anchors
Pull the shutters down
It makes me think about us
All those things that got lost
Still we're holdin' on And the storm rushes in
But it makes me feel like I'm alive again
Well sometimes in our lives, we need the pain The wind, the rain, the storm will wash us clean again
The wind, the rain, the storm will shake us up again
The wind, the rain, the storm will make us think again
The wind
And maybe we can start again Storms out on the water
Seein' skies become one
Are you coming home?
