

Antimatter

Dragonland

Radioactive decay
A separation of fractal cycles
Decelerating array "â€”
nothing stands in my way
Antiuniverse Before the stars were born
from matter it was torn
Reach out, you will... See, what science won't believe
A mirror for this world
Through gateways you will pass
Inverted human mass "Intertellar travels -
naught, in contrast to this...
...inversion of the universe known"
There will be no return
and soon you will learn
Now follow me Before the stars were born
from matter it was torn
Reach out you will... See, what science won't believe
A mirror for this world
Through gateways you will pass
Inverted human mass Leave this earth to a plane
With shadows lost in time
A vision of anti-life
Abandon your strife Solo: Magnusson Before this dream was born
my vision was forlorn
None believe but...
Now, behold what can't be seen
The mirror of a dream
There will be no return
So reach out, you will learn
