

Straight Ahead

Pennywise

all the things you want all the things you need you got the power to choose you got the right to be all the things
you loathe all the things you hate is what you will become until you will go straight all the things denied the shit
you can't believe you don't blame your self you blame society all the things in life that you've been waiting for
wait outside your door all your problems won't go away i guess this is the price you pay your decisions you will
soon regret throw away your life go straight ahead i see you everyday wasting your time away you got no
respect got nothing good to say all the things you loathe all the things you hate see what you will become unless
you will go straight all the things in life all that you wanna be but you don't even try you want it all for free all
the things in life that you've been waiting for wait outside your door
