

Say You Will

Black Peaks

We started out
A falling star
I kissed the sun
How bright you are
Through all the pain
Of this open window
I tasted fear down in the rain
Say you will x3
We started out
Amidst a fire
And dried it out
Down in the rain
Through all these pains
And these open windows
I'll dry you out
Now drown in my rain
Say you will x4
you will,
Say you will,
say you will, you will.

Say you willA shard of light has caught the night
And stranger still you walk awayFar beyond the walls is where we are
Stranger than the things that come to pass
A shard of light has caught the night
And stranger still you walk awaySuspendSay you will x2
you will,
say you will
