

# Stress Builds Character

## Dystopia

lives been swell now i want to die  
my body it hurts me sigh after sign  
i call it torture you call it life  
a slave to money and everything i despise  
like everyone in general  
fuck eat sleep destroy i am a disposable being  
who will fuck all life  
i multiply and the air gets thinner and dirty  
i take up space  
i smell  
i consume  
but i produce nothing  
i abuse  
i have no reason to exist  
the toilets clogged in this world o shit  
i breathe filth everyday  
living fucks up my brain  
why? why must i wake up today  
my eyes are heavy  
why? why must i see your face  
your life is ugly  
why? why did i buy into these things  
i don't want them  
tension. tension  
frustration. alone  
tension. despair. tension  
all these pressures on my life
