Policeman

Against All Authority

You want authority You want a war with me What motivated you You want authority And any opposition You want a war with me To reinforce all policy But I don't cause I know just how you take You suppress for a salary When I see you I should feel safe The answer - Is sedition Advantage - Of your position Don't understand so why don't you clue me in Cause there must be something that you're missing Somewhere deep within I have to disagree You say it keeps me free We've seen it before You infringe upon the rights Of those you should defend And we'll see it again
