

In Orbit

Caesars

All that I'm seeing around me
Bright shining stars that abound me
Suddenly out of control
Rather it catches my soul Don't know what's up or down
Somehow I feel like the clown
Maybe someday I will wake up
To find that it's all really made up Going in orbit with you
Oh yeah, that's all that I do Going around to the light side
Going around to the dark side
Behind me a gray big nothing
I think that we really had something I don't have to fear a black hole
Out here I'm sure of my role
All that I am is weightless
All that I see is timeless Going in orbit with you
Oh yeah, that's all that I do
Going around and around
I'm going in orbit with you
