

First Love Never Dies

Eugene Wilde

Maybe first love never ever dies
That's why I'm still in love with you
Hold me close and look into my eyes
And tell me you don't feel it too
The way it used to be when you told me
It would be forever, you and me together

And, we never really said goodbye
We never really said it's over
We never really said goodbye
First love never dies
When i saw you I could hardly speak
You're just as beautiful as ever babe
I guess it's still the same mystique
First love never dies

Maybe you just wasted all of your love
We can't go back but we go on
Singing love songs we have once begun
Before we drifted far apart
Before I knew I lost my heart
We'll live forever, only you (only you)
With my life together

We never really said goodbye
We never really said it's over
We never really said goodbye
First love never dies
When i saw you i could hardly speak
You're just as beautiful as ever babe
I guess it's still the same mystique
First love never dies

The first love, never dies
It never dies (it never does)
First love never dies...

We never really said goodbye
We never really said it's over
We never really said goodbye

First love never dies.....
