

Come Over

Faith Evans

Won't you come over and make love to me
'Cause I haven't seen you in a while
Really miss your smile, oh
Won't you come over and make love to me
Baby I want you Every time we're together, I feel a special part of me
Drawing me closer, closer to you, baby
I can't explain it's just the magic that we share
Something between us two Won't you come over and make love to me
'Cause I haven't seen you in a while
Really miss your smile, oh
Won't you come over and make love to me
Baby I want you Sitting here in my window
Thinking of nothing but your face, oh, baby
I try to remember how it used to be
When you used to love me
Love me everyday, oh baby I don't wanna fight ya, I just want you to see
That you are the one, the only one that's for me
Baby, let me show ya, there's no greater love
Baby, I love you for the things you do
And I want you to come over You come over and make love to me
'Cause I haven't seen you in a while
Really miss your smile, oh
Won't you come over and make love to me
Baby I want you I don't wanna fight ya, I just want you to see
That you are the one, the only one that's for me
Baby, let me show ya, there's no greater love
Baby, I love you for the things you do
And I want you to come over You come over, won't you come over
Baby I just wanna make sweet love
Just wanna show you, you are the one
Won't you come over, won't you come over
Baby I just wanna make sweet love
Just wanna show you, you are the one
Won't you come over, won't you come over
Baby I just wanna make sweet love
Just wanna show you, you are the one
Won't you come over, won't you come over
Baby I just wanna make sweet love

Just wanna show you, you are the one
Won't you come over, won't you come over
