

Out Of This World

Jonas Brothers

It was cloudy on that night
There were no stars in sight
Then the planets all aligned
When I saw her eyes
One look that's all it took
To send me to another galaxy
She said, she was on her way to Mars
Then she ran into a star and she fell into my arms
Thank you gravity, never let her go
I'll hide her U.F.O., she'll never have to know
She's my space girl and she's outta this world
We were watching Star Wars
She looked kinda bored
Said she'd seen it all before
Made me wonder even more
Which universe was hers?
What galaxy did she call home?
(Yeah)
She was on her way to Mars

Then she ran into a star and she fell into my arms
Thank you gravity never let her go
I'll hide her U.F.O., she'll never have to know
She's my space girl and she's outta this world
She says the moon is overrated
Jupiter's her favorite and Pluto can't hang
(Pluto can't hang)
Like a meteor I'm falling from the first time I saw her
It was heaven on earth
(Heaven on earth)
She was on her way to mars
Then she ran into a star and she fell into my arms
Never let her go, I'll hide her U.F.O.
She'll never have to know, yeah
She was on her way to Mars
Then she ran into a star and she fell into my arms
Thank you gravity, never let her go
I'll hide her U.F.O., she'll never have to know
She's my space girl and she's outta this world
