I'm With You

The Stills

The timing's right and the light is soft
We've come from far and we came here lost
We're moving east, we're rolling through
If you believe in me I'll believe in youI'm with you, I'm with you
If you want me to the night isExplosive highs to breakneck lows
Every mirror in the house has broke
But the moon is red and the sky is green
In the loneliest place you've ever beenI'm with you, I'm with you
If you want me to the night isA darkness shines through my airplane
Purple and bright on my window pane
And be close to me, be where I am
Where the wind is hard, where the wind is hardI'm with you, I'm with you
I'm with you, I'm with you
I'm with you, I'm with you
I'm with you, I'm with you
If you want me to the night is
