Siren On The 101

Over It

Up and away to stay
Awhile in the arms of fate
Where did we start this crush?
The question could stop my heartGo onSun on your skin all smiles
A star at your side, you fly
Hands on the wheel, held tight
Don't you let go, just give it timeGo onTell me all you hear is our song
Like a siren on the 101
Did you come to say so long?
I was sure we had just begunTell me all you hear is our song
I know, I can't be the only one
You and me, we are a breakthrough
Just forget the rear view
Don't ever let me goWas it a test? This crime
A footnote in your meantime
A shot in the dark
When I was certain we had come so farGo onBut I've got a light to blind
A vision of doubt tonight
The song on my lips will fly
And follow you home wherever you goGo onTell me, all you hear is our song
Like a siren on the 101
Did you come to say so long?
I was sure we had just begunTell me, all you hear is our song
I know, I can't be the only one
You and me, we are a breakthrough
Just forget the rear view
And don't ever let me goWhere'd you go, what'd you want to know?
What did you come all this way for?
Where'd you go, what'd you want to know?
What is the luster worth so much more?Where'd you go, what'd you want to know?
Wonder if my heart can tie up the score
Where'd you go, what'd you want to know?
Where'd you go, what'd you want to know?All I hear is our song
I don't care 'bout the damage done
So turn it up and sing, sing along
I still feel like we've just begunAll I hear is our song
I know, I can't be the only one
But you and me, we are a breakthrough
Just forget the rear view

Don't ever let me goTell me, all you hear is our song
Like a siren on the 101
Did you come to say so long?
I was sure we had just begunTell me, all you hear is our song
I know, I can't be the only one
You and me, we are a breakthrough
Just forget the rear view
And don't ever let me goDon't let me go
Ever let me go
