

# First Things First

## Sense Field

Tell me the first thing you feel  
When you're taking in air  
Tell me the first thing you feel  
When your body could care less  
    About the time of day  
    About what people say  
Tell me the first thing you feel  
After you close your eyesDo you recognize  
The voice that's been telling you all this time  
    He's been watching over you  
    Listening to every single word  
    Thinking out everything  
    Do you realize  
    He's been watching over you  
    Listening to every single song  
    Singing out everything  
    Everything... (x3)  
Tell me the first thing you feel  
    When I reach to touch you  
Tell me the first thing you feel  
When you smile and you cryDo you recognize  
The voice that's been telling you all this time  
    He's been watching over you  
    Listening to every single word  
    Thinking out everything  
    Do you realize  
    He's been watching over you  
    Listening to every single song  
    Singing out everything
