Never Leave Your Side - Remix

One Voice

1st verse:
I know your feeling down
Because she broke your heart
Dont think that it's the end
You just gotta try and start
Over with someone, someone who's gonna care
Care about the way you feel, when no one else is there
But she gotta be patient because love takes some time
And you always gotta be on guard cause true love is so hard to find
Never know, who or where, how or why
When the woman you've been waiting for is right before your eyes
Chorus:
Whenever you're lonely
You can call on me
Cause I promise to be
There until eternity
If the mountains may fall
And the sun refused to shine
I'll be with you through it all
And whenever you hold me
I get a rush inside
You can tell by my touch

That I just can't lie
The way I feel about you just feels so right
Baby I will never leave
2nd verse:
So open up your eyes
And let your mind free
What you've been searching for
Is all inside of me
So don't you be afraid
'cause I won't let you down
Sweet love and honesty
In you I've finally found
3rd verse:
I'll be your fantasy
I'll be your dreams at night
Don't ever have a doubt

'cause the feelings oh so right
To have you here with me
Feels like your heaven sent
And since you've been with me
I've been in love ever since
