

# We Touched the Sun

Gary Allan

We touched the sun, we held the stars  
We fell in love with open hearts  
We chased our dreams that went beyond  
We did it all, we touched the sun When I look back, Im glad we found each other  
With no regrets along the way  
And what was like an endless summer  
And it's just yesterday We touched the sun, we held the stars  
We fell in love with open hearts  
We chased our dreams that went beyond  
We did it all, we touched the sun And even if it's not forever  
We were meant to be together  
Even if it's only for a while now We touched the sun, we held the stars  
We fell in love with open hearts  
We chased our dreams that went beyond  
We did it all, we touched the sun We chased our dreams that went beyond  
We did it all, we touched the sun We touched the sun  
We touched the sun  
Touched the sun
