

Rush

People In Planes

I wouldn't want to rush you
Home again
I'll pay to see you
Again and again You know you terrify me
That's not what I want
Is that what you want Cause it's important to me
I just never told you Beware of the professionals
You won't get me on that bicycle with you How much do you live in denial
How much do I You know you terrify me
That's not what I want
Is that what you want
Yeah the connection is real
And that's just what I want I wouldn't want to rush you
Home again
A lonely evening
Oh no not again
