

Yes I Can

Valdy

So they say that a man
Can't live in this world
If he's wearing his heart on his sleeve
I can And they say that a man
Cant understand
What a woman needs when she cries
I can, I can And I can see you standing in the yard
Tending the roses in your garden
The sun is shining through your cotton dress
And I will freeze this moment here in time
I could live forever in your garden, oh yes
Yes I can The fool doesn't know
What he's missing the most
It's a bitch and a place to be in
Here I am How would I know
I could give up the ghost
And still hold all your dreams in my hand
Here I am, here I am And I can see you standing in the yard
Tending the roses in your garden
The wind is blowing through your golden hair
And I will freeze this moment here in time
I could live forever in your garden, oh yes
Yes I can And I can see you standing in the yard
Tending the roses in your garden
The sun is shining through your cotton dress
And I will freeze this moment here in time
I could live forever in your garden, oh yes
Yes I can And I can be your man
Yes I can
