

Everything We Touch

Say Lou Lou

I lived inside the hidden bay,
And time used to pass so slow
I raised dragons by my side,
But I, I had to let them go I feel like we're running wild
And we, we gotta let it go
And these days you're by my side
But I, I gotta let you know Days of ashes and nights of flames
A thirst for beauty then thirst for games
Do you need to see my soul,
Just let me know
When you get high Everything we touch turns to gold at night
In the dark we make it special, make it justified
Everything we touch turns to gold at night
There's a ghost in the machine, there's a glowing light Now there's a black star on my sun,
I can't make it go away
I spend lightyears wasting my time
Until I knew your name Days of ashes and nights of flames
A thirst for beauty then thirst for games
Do you need to see my soul,
Just let me know
When you get high Everything we touch turns to gold at night
In the dark we make it special, make it justified
Everything we touch turns to gold at night
There's a ghost in the machine, there's a glowing light When you get high
In the dark we make it special, make it justified Everything we touch turns to gold at night
In the dark we make it special, make it justified
Everything we touch turns to gold at night
There's a ghost in the machine, there's a glowing light
