No Sir

Halo

There's a shadow in the wings
And you let it tell you things
Yeah, you plant it in the ground
But you don't make a sound
No, sirAll the helicopters fail
You can feel them on your trail
You can hear it in his voice
But you don't have a choice
No, sirWork on your story, sir
Are you worried her mood's
gonna waver and change?
Don't blame the world or the girl for
what keeps you estrangedThere's a light nobody's seen
In a place you've never been
And it's fluid
Where it turns into steam
you'll walk through it
Even wading upstream you'll get to it
There's a way and it is known
But you won't make it there alone
No, sir
