

Sticks And Stones

Alien Ant Farm

I liked you
You showed me
These calls must
ContinueTime is collapsing in my head
I built all the walls you can't come in
You were to one that called me last
I highly doubt this thing will lastSticks and stones, they hurt
When you shoot them through the phone
And you drag my name, through dirt
And it hurts to be left here aloneElegant thoughts I will not share
My symphonic silence
I hope you can bear it baby
I liked you, you showed me
Exactly who I don't wanna beSticks and stones, they hurt
When you shoot them through the phone
And you drag my name, through dirt
And it hurts to be left here aloneI'll always look for you
I'll always look for you
I'll always look for you
YouYou were the one that called me last
I highly doubt this thing will last
Cause you were the one that messed upSticks and stones, they hurt
When you shoot them through the phone
And you drag my name through dirt
And it hurts to be left here aloneSticks and stones
Get shot through the telephone
With instant results
We both left alone
Alone
