Sticks And Stones

Alien Ant Farm

I liked you You showed me These calls must ContinueTime is collapsing in my head I built all the walls you can't come in You were to one that called me last I highly doubt this thing will lastSticks and stones, they hurt When you shoot them through the phone And you drag my name, through dirt And it hurts to be left here alone Elegant thoughts I will not share My symphonic silence I hope you can bear it baby I liked you, you showed me Exactly who I don't wanna beSticks and stones, they hurt When you shoot them through the phone And you drag my name, through dirt And it hurts to be left here alone I'll always look for you I'll always look for you I'll always look for you YouYou were the one that called me last I highly doubt this thing will last Cause you were the one that messed upSticks and stones, they hurt When you shoot them through the phone And you drag my name through dirt And it hurts to be left here aloneSticks and stones
