This Was Never

Name Taken

I'm not with you
When you say "It won't mean a thing love"
I still can't move
Once you've let me in and still closerThis was never suppose to happen
No one's meant to know about us
This was never suppose to happen
No one's meant to know, meant to knowStay when there's nothing between us
Oh pray for what's left of to save
Let's not go back
Let's do our best to blend in and forget
I still can't move
I miss the feeling and everything but youThis was never suppose to happen
No one's meant to know about us
This was never suppose to happen
No one's meant to know, meant to knowIt's never this cold...
Where my beating strength once came from
It will never be strong or beat again, or beat again
It's never this cold...
