

Galaxies

Owl City

Through the galaxies
Through the galaxies
Through the galaxies
Through the galaxiesThrough the galaxies
Through the galaxies
Through the galaxiesCall back the cap-com, tick off the time bomb
Let felicity fly
Armor the airlock, blanket the bedrock
And kiss the planet goodbyeDear God, I was terribly lost
When the galaxies crossed and the sun went dark
But dear God, You're the only North Star
I would follow this farThrough the galaxies
Through the galaxies
Through the galaxies
Through the galaxiesThrough the galaxies
Through the galaxies
Through the galaxiesFight back the flight deck, bring on the breakneck
Cue the solar eclipse
Summit the sunset, dovetail the dragnet
And blow your backbone to bitsDear God, I was terribly lost
When the galaxies crossed and the sun went dark
But dear God, You're the only North Star
I would follow this farOh telescope, keep an eye on my only hope
Lest I blink and be swept off the narrow road
Hercules, you've got nothing to say to me
'Cause you're not the blinding light that I needFor He is the saving grace of the galaxies
He is the saving grace of the galaxiesDear God, I was terribly lost
When the galaxies crossed and the sun went dark
But dear God, You're the only North Star
I would follow this farI would follow this far
Through the galaxies
Through the galaxies
