## **Galaxies**

## **Owl City**

Through the galaxies

Through the galaxies

Through the galaxies

Through the galaxiesThrough the galaxies

Through the galaxies

Through the galaxiesCall back the cap-com, tick off the time bomb

Let felicity fly

Armor the airlock, blanket the bedrock

And kiss the planet goodbyeDear God, I was terribly lost

When the galaxies crossed and the sun went dark

But dear God, You're the only North Star

I would follow this farThrough the galaxies

Through the galaxies

Through the galaxies

Through the galaxies Through the galaxies

Through the galaxies

Through the galaxiesFight back the flight deck, bring on the breakneck

Cue the solar eclipse

Summit the sunset, dovetail the dragnet

And blow your backbone to bitsDear God, I was terribly lost

When the galaxies crossed and the sun went dark

But dear God, You're the only North Star

I would follow this farOh telescope, keep an eye on my only hope

Lest I blink and be swept off the narrow road

Hercules, you've got nothing to say to me

'Cause you're not the blinding light that I needFor He is the saving grace of the galaxies

He is the saving grace of the galaxiesDear God, I was terribly lost

When the galaxies crossed and the sun went dark

But dear God, You're the only North Star

I would follow this farI would follow this far

Through the galaxies

Through the galaxies
