

Beat the Drums

Eron Falbo

Beat drums and sing out what you're feeling
Beat drums and sing out make a billion You're a decent a person
You're just not certain
There's a Jesus trapped in there But you're not so far
Sitting in your car
Going no place anywhere But it seems to me
You also wanna be free
But you don't know what you're supposed to do Look in the devil's eyes
If you wanna fly
And put his feet right in your shoes But what you are
Is a star So beat the drums
You're a Star
So beat the drums
That's what you are Beat drums and sing out what you're feeling
Beat drums and sing out make a billion When you were a child
You were really wild
But you never bought a gun Listened to your friends
When they said that then
You'd spoil all the fun You often think of girls
You think of better clothes
And a golden crutch to lean You think of better lands
Of course you understand
That it's somebody else's dream But what you are
Is a star So beat the drums
You're a Star
You're a Star
So beat the drums Beat drums and sing out what you're feeling
Beat drums and sing out make a billion
