Cherry Lips

Loon Lake

Shaky feet but solid ground
Everyone's on valium and no one's around
She can't seem to find a friend in the whole of this town
Maybe your not looking or your only looking down

But it's almost night time
and you know that's the right time to dance
Put your cherry on your lips and shake your sexy hips
Tonight's the chance
ooh to dance, yeah to dance

He won't even notice that you just put two pills down
Except the way you cuddle him or the way you jump around
He calls you by your last name but he thinks that it's your first
Everyone's in love with him but your just feeling worse

But it's almost night time
and you know that's the right time to dance ooh
Put your cherry on your lips and shake your sexy hips
Tonight's the chance
ooh to dance, yeah to dance

Chorus repeats x 3
