Reservoir

Metronomy

I heard you made the hull of a boat downtown
I heard you got a job at the builders yard
But we should never say that we drifted far
Yeah we should never say that we drifted farAnd I could never take good care of you
Because we had so much to lose
But we should never say that we drifted far
Yeah we should take a trip to the reservoir
Yeah we should take a trip to the reservoirHeartbeats drifting together
Heartbeats aaaaah
Walk in the wood
Wet under foot
Up to no good
Ah-ah-ah-ahI heard you cast off and she sailed real fine
I heard you met her bow with a bottle of wine
Well you should let me know when you're home and dry
Well you should let me know when you're home and dryI heard you took an old school friend with you
The one you always said you would
Well we can never say that we drifted farYeah we should take a trip to the reservoir
Yeah we should take a trip to the reservoirHeartbeats drifting together
Heartbeats aaaaah
Walk in the wood
Wet under foot
Up to no good
Ah-ah-ah-ah
