

# Over You

## Roddy Frame

The thrill on your face looked down and left  
Now I'm filling a space I've torn in my chest  
All the effects, a churning machine  
But nobody left to care what it means  
Stopped dead in my tracks, I froze in my steps  
Tried to get back, I couldn't connect  
Heard you were out, SW3  
Talking about how you were over me  
All of our time's been torn in two  
Now I spend all of mine tryin' to get over you  
Now that you've gone, I wish you were here  
Everything's wrong, nothing is clear  
Everything we shared and believed  
Is left here with me, now you're finally free  
Are the trees turning red where you are today?  
Wish you had said you were headed that way  
I see you sat on a bus, saying I drove you to split  
When I say think about us, you say, "Aw, get over it"  
Me stuck on the strand, trying to get through  
And make myself understand that I've gotta get over you  
Gotta do what I can until I get over you  
I'm gonna make like a man and then I'll be over you
