

# The Freezing Moon

## Mayhem

Everything here's so cold  
Everything here's so dark  
I remember it from a dream  
The corner of this time Diabolic shapes float by  
Out from the dark  
I remember it was here I died  
By following the freezing moon It's night again, night you're beautiful  
I'll please my hunger, on living humans  
Night of hunger, follow it's call  
Follow the freezing moon, yeah Darkness is growing, the eternity opens  
The cemetery lights up again, as in ancient times  
Fallen souls, die behind my steps  
By following the freezing moon, yeah
