Kiss for Kiss (feat. Jake Shears)

Bright Light Bright Light

Sleep alone at night, find a way to be independant while, holding onto me
and when we're far away the distance doesn't sever, you can feel inside, we move together
you left lines all over my heart, I trace them with my fingers as I'm laying in the dark
we give love a little too hard, but kiss for kiss ill match you cause I like the scars
you left lines all over my heart, I trace them with my fingers as I'm laying in the dark
we make love a little too hard, but kiss for kiss ill match you cause I want to go that far
another moment while, there's something in the way, we put our lips together, it keeps the taste
and we're forever moving, in eachother's arms, there is no me and you now, together we are
little lines over my heart, I trace them with my fingers as I'm laying in the dark
we make love a little too hard, but kiss for kiss ill match you cause I like the scars
you left lines all over my heart, I trace them with my fingers as I'm laying in the dark
we make love a little too hard, but kiss for kiss ill match you cause I want to go that farI want to
I want to
I want to
I want to
I want to
I want to
I want to
I want to go that far
I want to
I want to
I want to
I want to go that farIt's like the only thing we understand is time, and how much might be left before we find eachother, on and on, face to face
and eye to eye and realize
you left lines all over my heart I trace them with my fingers as I'm laying in the dark
we make love a little too hard, but kiss for kiss ill match you cause I like the scars
you left lines all over my heart I trace them with my fingers as I'm laying in the dark
we make love a little too hard, but kiss for kiss ill match you cause I want to go that farI want to
I want to go that far
I want to
I want to
