

# Youth Knows No Pain

[Lykke Li](#)

Come down from where you are and get down  
We are what we are, now we are found  
Till the sun of the prison, the guns  
We've taken all our vows, we are find Come on get down, come get down  
Make amends, make a vow  
Come on get down, come get down  
Mighty you, here now So come on honey, grow yourself to pieces  
Come on honey, give yourself completely  
And do it all although you can't believe it Youth knows no pain  
Youth knows no pain Come together and join the parade  
And get back what got lost in the trade  
When the puns and the shimmering beads  
With the wind in my hair we are free Come on get down, come get down  
Make amends, make a vow  
Come on get down, come get down  
Mighty you, here now So come on honey, grow yourself to pieces  
Come on honey, give yourself completely  
And do it all although you can't believe it Youth knows no pain  
Youth knows no pain I said you, no, no  
Youth knows no pain  
I said you, no, no  
Youth knows no pain So come on honey, grow yourself to pieces  
Come on honey, give yourself completely  
So come on honey, grow yourself to pieces  
Come on honey, give yourself completely  
And do it all although you can't believe it Youth knows no pain  
Youth knows no pain
