Sleep Apnea

Chevelle

There sat a new test much harder that you bought in
As for the unseen just take care of what you will
Light the silent alarm
We never think that we're missing much till
I gasp and hold my breath
These needs had changed so deep
To face you all and say I've been awake for
I need a new test then I set out to choose someone to
Light the soul like a kiln just imagine us chasing this with
Eyes scorned from sleep apnea
A slight of tongue as the seas are emptying
I gasp and hold my breath
These needs had changed so deep
To face you all and say I've been awake for
Forever, forever, forever, forever
Try to read off a letter that's falling apart
The sun and the moon I count sheep
Escape like an animal I'm ready for my sleepless stroll
I've felt these shifting hours mistakenly used up
I gasp and hold my breath
These needs had changed so deep
To face you all and say I've been awake for years
I gasp and hold my breath
These needs had changed so deep
To face you all and say I've been awake for
Forever, forever, forever, forever
