

Titan

Brave Saint Saturn

Behind what I know and see
A darkness that will spy on me
Eclipsed in this trajectory
A cancer that is eating me
Destroy, divide the dark inside
Destroy, divide the dark inside
In between the molecules is cold
No light for shaking fingers to ever have their hold
And I'm afraid I'll never see the light
The blind are following in sightless plight
Here it comes
Destroy, divide the dark inside
Destroy, divide the dark inside
Titans looming over me
Giants that are crushing me
Titans looming over me
Giants that are crushing me
Here it comes
Destroy, divide the dark inside
Destroy, divide the dark inside
Destroy, divide
