

# Mr. Blue

Laura Nyro

Advisory - the following lyrics contain explicit language:

Hello, he said, Hello? Id like to see you  
He said, Sweetheart look you know what happens  
When we get together, I mean Ive heard of liberation  
But sweetheart, youre in outer space Oh Mr. Blue Ive been studying  
The radar in the sky, I can almost run, fly  
Listen like the animals do  
Im ready to meet the crew, yes Im ready for you Earth calling you  
Ive been a gypsy fire, warm desire  
Youve seen this too  
Roger and out Mr. Blue This is the song of communications  
Sending out peace vibrations  
Genuine cause to end our wars Or is this the song of complications, a hopeless declaration?  
Can we mend, transcend  
The broken dishes of our love, our conflicts, yeah?  
Can we be friends? Hello, he said, Hello, this is your copilot  
He said, Yeah, look sweetheart  
Ive loved you but you can be so arrogant  
And you dont know anything about being cool Oh Mr. Blue Ive been studying  
The radar in the sky, measuring earth and time  
The rainbows on your pillow are new  
Im a fucking mad scientist too Baby, baby let the one who loves you come through  
Baby, come through, baby come through  
Earth calling you Baby, come through, baby come through  
Earth calling  
(This is the song of communications)  
Through, baby come through, baby come through  
(Written on a peace vibration)  
Earth calling  
(Or is this the song of complications?)  
Through, baby come through, baby come through  
Earth calling Calling, calling, calling you  
Oh Mr. Blue, oh Mr. Blue, oh Mr. Blue
