

Abolish the Sun

[Helstar](#)

Abolish The Sun
Bells ring darkness
Come feel hell's caress
When the death knell tolls
Never shall you grow old
I am a scourge placed on this earth
I bring you death, I bring rebirth
I drain all life, my will be done
Immortal eclipse, I abolish the sun
Alone I'm made to wait
Though many have met their fate
None worthy of my throne
Flesh turned into bone
Suspended in the gallows of time
To the twilight I am confined
Captive of the one who turned me
Your soul becomes my key
Crawl into your grave
Freedom for the slave
Obsidian wings scrape the sky
To kill you first must die
