

# Blow Me (Like the Wind)

## Turbonegro

C'mon You think I'm fat  
But its an optical illusion  
You know I'm hot  
It's just my chemical solution So when you hear my mighty call  
You better  
Hoist your sails and pray for the gods of wind  
To blow us all So blow me  
Blow me like the wind  
Blow me  
Blow me once again Tonight I'm feeling tops  
On the stairs of evolution  
I call the shots  
In my genetic revolution Cause I've been waiting  
Waiting night and day  
Just something good might blow  
Might blow my way So blow me  
Blow me like the wind  
Blow me  
Blow me once again If I gave you a TENER  
Would you raise my antenna  
If i gave you a dime  
Would you blow my paradigm  
If I gave you my candle  
Would it be too hot to handle  
If I ran for election  
Would you support my erection So blow me  
Blow me like the wind  
Blow me  
Blow me once again
